

Girona by night

*A stroll through
undiscovered nature*

CITY – NATURE – SENSES

Girona by night

A stroll through undiscovered nature

The sun goes down and a new city awakens. Nature surprises us with magical new sensations and makes us discover unsuspected perspectives

A walk through the natural surroundings of Girona to experience its most mysterious side, unknown landscapes and night-time dwellers. A real revelation for the senses.

Just outside the ancient city walls, we can easily discover some of the most familiar and yet unknown natural wonders. A very different way of enjoying nature in nearby fields and forests and, along the way, and to admire a sunset from a privileged place with a view of the Pyrenees and the city at our feet.

At a leisurely pace, you can learn about the noisiest inhabitants of the night and also about the most secretive ones who move through land, water and sky. And in a playful manner, you can identify our most common aromatic plants without actually seeing them.

A trip for the intrepid who want to explore the most natural night of Girona and for families who are looking for fun while traveling with their little ones.
