

Wine pairing among flowers

A walk through wine country

WINE PAIRING – TASTING – MEDITERRANEAN FLOWERS

Wine pairing among flowers

A wine pairing with Mediterranean wild flowers and wines. A unique and original approach to bring natural landscape and its history to the palate by using wine. El Celler de Can Roca's botanist and a sommelier take us to the terroir through the bouquets and sensations in our mouth.

The activity is divided in two different, but complementary parts that can be carried out together or independently.

A walk in natural surroundings of some of Catalonia's most emblematic landscapes to discover aromatic herbs and flowers of our territory.

An easy, agreeable walk to discover why we are the land par excellence of the world's aromatic plants.

A taste of four wines paired with flowers common in the area.

An experience guided by a duet from different perspectives: a sommelier shows us how to enjoy a wine tasting and Evarist March shares his gastrobotanical experience of the land and its cuisine.

Flowers are the purest representation of any land: they represent the essential relationship between climate, land and human interaction. In the same way, wine entails the history of this century-long relationship through the use of its fruits.

Duration: Walk (2,5 - 3h)
Wine pairing (2h)

Location: To be determined according to client's request

Group: 15 people maximum

Price: Consult our rates

The price includes:
