COSTA BRAVA – MEDITERRANEAN – WINE WORLD

Discover culture through nature at the Costa Brava

*Wild green tapas walking between coves and
following in Dom Perignon's footsteps*

A lively walk along the South coast of the Costa Brava. A different kind of walk where we will be surrounded by typical Mediterranean forests.

The paths meander between forests and small sandy beaches, and lead us to discover, among others, both old and new cork forests that tell the story of wine and cava, Dalí's surrealist shack and some examples of traditional fishermen houses.

During the walk we will enjoy discovering and tasting some of the most representative wild aromatic plants of the Costa Brava, traveling from ancient recipes to the most sophisticated dishes of Catalan high gastronomy.
